

Hills Solar launches the Next Generation in solar hot water systems

11 August 2010

The Hills Group has been leading the way in harnessing the sun's natural energy since the introduction of the first Hills Hoist back in 1946. Today, Hills Solar is proud to announce the launch of the **Next Generation** solar hot water systems in Australia the Hills ESTEEM™ II and Hills EXCEED™

Setting a new benchmark for performance, efficiency, aesthetics, and reliability in solar hot water systems, the Hills ESTEEM™ II and Hills EXCEED™ are the pinnacle of solar hot water technology in Australia.

With superior design, the Hills ESTEEM™ II and Hills EXCEED™ utilise the latest evacuated tube technology. This environmentally responsible and innovative technology results in the Hills ESTEEM™ II and Hills EXCEED™ saving up to 4 tonnes of Greenhouse Gas Emissions per year.

Hills Solar is committed to delivering the most advanced solar hot water systems in Australia. The Hills ESTEEM™ II and Hills EXCEED™ can save up to 90% of your hot water heating costs when compared to a standard electric storage hot water system.

Hills Solar's ESTEEM™ II and Hills EXCEED™ provide Australians with an advanced, energy efficient and environmentally friendly source of water heating. With a history of utilising natural resources, it makes sense that Hills Solar should be at the forefront of solar hot water technology- because no one understands the Australian sun like Hills.

Hills. Proudly an Australian Owned Company
